

MTBF Test Report

Tested Model	7" iP Series models
Quantity of Tested Samples	10 units
Test Duration	1,000 hours
Test Date	2025.5.5~2025.6.16
Test Condition	temperature : 50°C, humidity : 90%
MTBF	182,000 hours
Included Models	MT8072iP

1. The MTBF formula is :
$$MTBF = \frac{1}{\lambda} = \frac{2 * tp * AF}{X^2(\alpha, \beta)}$$

2. Parameter Description :

λ	Steady State Failure Rate
tp	Total Test Time
AF	Acceleration Factor
$X^2(\alpha, \beta)$	Non-Central Chi-Squared Distribution Function

3. Calculated Parameter Value :

Confidence Level	90%
AF	42.016
tp	10,000 hours
$X^2(\alpha, \beta)$	4.605

4. Test Result :

$$MTBF = 2 * 10000 * 42.016 / 4.605 \doteq 182,472 \text{ hours}$$

$$\doteq 182,000 \text{ hours}$$
